

## TRAP Fencing System

Total Reptile & Amphibian Protection

Information Sheet

The Reeve-Tec Trap range of fencing has been developed to meet current statutory requirements, whilst at all times ensuring the most sustainable, environmental and commercially aware system can be offered.

Manufactured from 100% recyclable materials, which are re-useable and low maintenance, the unique installation

and fixing methodology will ensure that performance is maintained even in the most adverse of ground or weather conditions.

The fencing is available in both temporary and permanent form and can be installed at either 45° as an unidirectional exclusion barrier or at 90° as a complete barrier.

TRAP fencing can be purchased as a "supply only" product or using our trained operatives, a full design, installation and maintenance package can be prepared.

Reeve-Tec are also able to offer a suitably qualified ecological clerk of works to ensure all installation is completed in a correct manner.
